

Across the Globe

A Complete Scholastic Approach to Learn Social Studies

3

Aligned with the **Single National Curriculum**

Every child has different abilities and needs.

We should help class fellows in learning when they find it difficult.

When parents and children take care of each other, they become friends.

Children must take care of their elders when they need them.

We all depend on each other.

We need plumbers to repair taps.

Farmers grow crops in villages and sell them in cities.

Can cities fulfill their food needs if farmers do not sell their crops in cities? Yes No

Lesson 4 Village Life

STUDENTS' LEARNING OUTCOMES

All the students will be able to:

- recognise that the people of Pakistan live in villages and cities
- identify key characteristics of a village (buildings, facilities, environment and the work people do).

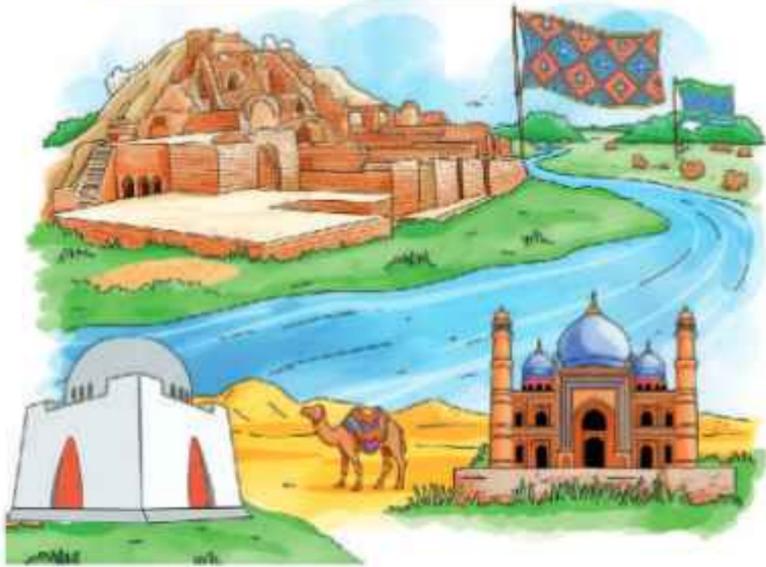

Hira lives in a city. During her vacations, she went to her uncle's village. There, she saw lots of greenery. The fresh air felt nice and clean.

Life in the village is different from life in the city. In villages, people wake up early in the morning. Their houses are small and made of mud, wood, or straw. They often use firewood and cow dung patties for cooking. Most men and women work on farms. Villages have fewer facilities than cities. There are clinics, small shops, tube wells and broken roads.

Cultural Diversity in Provinces and Areas

Sindh

Language: Sindhi

Dress: Ajrak and Sindhi Topi

Food: Fish, Sindhi Biryani

Punjab

Language: Punjabi

Dress: Colourful Shalwar

Qamees

Food: Saag, Makai ki Roti

Khyber Pakhtunkhwa

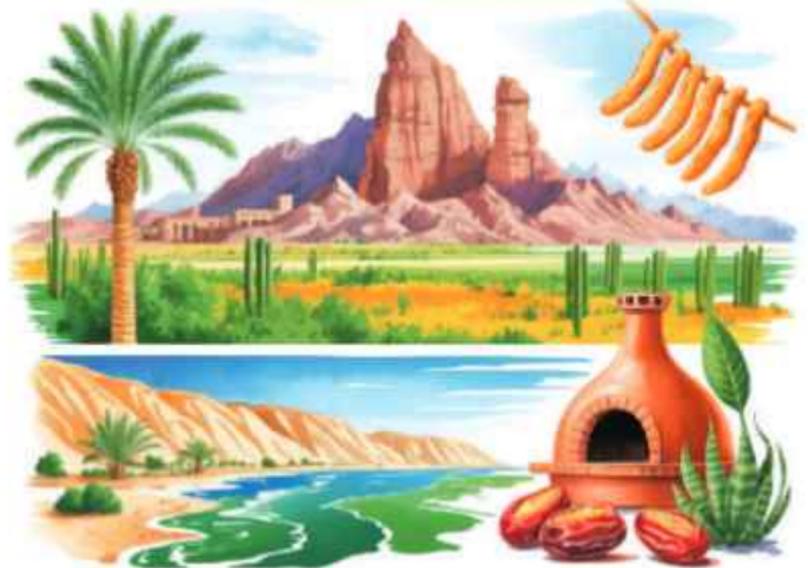

Language: Pashto

Dress: Turbans and Waistcoats

Food: Pulao, Kabab

Balochistan

Language: Balochi

Dress: Long robes and Turbans

Food: Sajji, Roti, Kaak,
Khaddi Kabab

Extinct animals are animals that no longer exist anywhere in the world. For example, megalodons and dinosaurs.

Animals become extinct due to loss of habitats, hunting, pollution, and changes in the climate. Sometimes, diseases or natural disasters can also cause animals to disappear forever.

Skeletons of dinosaurs have been found which helped scientists to learn more about them. There may be more extinct animals which might discover in future.

DID YOU KNOW?

Dinosaurs lived around 200 million years ago.

Activity Time

Write 200 million in number.

Megalodon skeleton

Dinosaur skeleton

WHAT DO YOU THINK?

The Megalodon was the largest giant shark to ever live in the ocean.

Why are they extinct?

About the Series

Across the Globe is a series designed to support the needs of students from pre-primary to grade 5, fully aligned with **Pakistan's Single National Curriculum (SNC)**. The topics are carefully chosen to be age-appropriate, engaging, and meaningful for children. It develops cognitive, affective, and psychomotor skills while encouraging curiosity, exploration, and critical thinking.

Each chapter includes special features that keep students motivated.

- **Let's Explore** allows children to discover and learn more about different topics.
- **Activity Time** provides hands-on tasks that make learning active and fun.
- **What Do You Think?** inspires reflection and independent thinking.
- **Did You Know?** shares fun and interesting facts that stick in memory.
- **Excitement** brings surprising information that sparks curiosity.

A separate **Skills Book** extends learning with end-of-chapter exercises, including questions and answers, fill in the blanks, and activities such as **Fun Time** and **Research Time**, etc. These elements make learning active and enjoyable while strengthening essential skills.

Through this approach, *Across the Globe* nurtures problem-solving, social interaction, collaboration, and civic sense, helping students connect with their surroundings at local, national, and global levels.
